

**BIODEGRADABLE CORROSION INHIBITOR COMPOSITION****Abstract**

5        A corrosion inhibitor composition includes between  
about 90 and about 99 percent by weight ammonium benzoate,  
and one or more additive components in an amount of between  
1 and about 10 percent by weight of the composition. The  
one or more additive components are selected from the group  
10 consisting of silica, triazoles, and wetting agents.
